(54) **Dynamically selecting either frame rate conversion (FRC) or pixel overdrive in an LCD panel based display**

(57) In a liquid crystal display (LCD) panel based display, a method of dynamically selecting either frame rate conversion (FRC) or pixel voltage overdrive is disclosed. The method is carried out by performing the following operations. A video vertical refresh rate of an incoming video data stream is determined and based upon the

determining, only one video data stream conditioning protocol from a number of available video data stream conditioning protocols is selected. The selected video data stream condition protocol is then applied to the video data stream

摘要(译)

在基于液晶显示 (LCD) 面板的显示器中，公开了一种动态选择帧速率转换 (FRC) 或像素电压过驱动的方法。通过执行以下操作来执行该方法。确定输入视频数据流的视频垂直刷新率，并且基于该确定，仅选择来自多个可用视频数据流调节协议的一个视频数据流调节协议。然后将所选择的视频数据流条件协议应用于视频数据流
