(54) **Organic light emitting display apparatus**

(57) An organic light emitting display apparatus having improved impact resistance includes a bottom substrate (110) including a display area (DA) and a peripheral area (PA) surrounding the display area (DA); a plurality of organic light emitting devices (200) arranged in the display area (DA) of the bottom substrate (110); a top substrate (300) corresponding to the bottom substrate (110); a sealing member (400), which is arranged in the

peripheral area (PA) of the bottom substrate (110) and attaches the bottom substrate (110) to the top substrate (300); and an anti-impact member (185), which is arranged in the peripheral area (PA) of the bottom substrate (110), is apart from the sealing member (400), and protrudes from the bottom substrate (110) toward the top substrate (300).
